

The following are comments from students during the sessions.

Tammy Paterson	I think the interaction worked best on the last session. We have ironed out all headphone and microphone issues which made sharing a lot easier and we got through more content as a result.
Rachael Heagney	Thankyou for all you wonderful work, you,ve done an excellent job and i greatly appreciate the time and effort you have made doing this!! Kind Regards, Rach!
Christine Cherry	Quite a slow way of learning. Ideas are great for resources.
Kryztal-Lee Kermode	this was great and i really enjoyed it was a little annoying at first but thats what this was for a trial :)
Hiroko Scott	had to participate because the pace of the talk speed up and slow down al the time and it is very hard to catch the questions and read all of the text and hear at the same time for me. the audio setting was not always great. takes me too long to get use to and the unit was next term and not this term. that makes me bit hard to focus on.
